## INTERNSHIPS AND PROJECTS

Internships **Lotus Preeti Comfort Home Care** ( Duration April 2025 - May 2025 )  
Independently designed and developed a fully functional, responsive website for Lotus Preeti Comfort Home Care using HTML, CSS, JavaScript, Firebase, and Bootstrap. Delivered 24+ interlinked HTML pages with seamless user registration/login, email inquiry integration, search modal functionality, and database-driven form handling using Firebase Realtime Database. Implemented modern UI/UX from static PNG designs provided by the client and ensured cross-device responsiveness. Collaborated with the client for feedback, adjustments, and live deployment. This project closely resembled a real-world internship by following timelines, deliverables, client interaction, and revision cycles.  
Skills used - HTML,CSS,Javascript,Firebase,UI/UX Design,Responsive Design,Real-time Database Integration,Form Handling,Client Communication,Deployment Strategy,Bootstrap 5

Projects **Places Finder - Location-Based Android App** ( Duration August 2024 - March 2025 )  
Final year B.Sc. IT project. Developed a smart location-based Android application to help users find nearby places such as hotels, restaurants, hospitals, and tourist attractions using Google Maps and Firebase services. The app includes user registration/login, category-wise place discovery, detailed place info, real-time reviews, and a dedicated admin panel to manage places, users, and feedback. Built using Java and XML with Firebase Realtime Database, Authentication, and Storage for robust backend support. Designed with BottomNavigationView and Fragment-based architecture for smooth navigation and modularity.  
Skills used - Android Application Development,Java,XML,Firebase Integration (AuthRealtime DBStorage),Google Maps,Google API,UI/UX Design,Fragment Navigation,Authentication,User Management,Real-time Data Handling,Testing,Debugging,Documentation
